As a graduate in Information Systems from ITB STIKOM Bali, I am passionate about building a long-term career in technology, with a dual focus on full-stack web development and game development. My journey in these fields has equipped me with a solid foundation in front-end technologies, allowing me to create seamless and user-friendly web applications using HTML, CSS, and JavaScript. Concurrently, I have hands-on experience developing digital game prototypes using the Godot Engine, reflecting my strong interest in the gaming industry.

Education

2018 – 2022 **Information Systems, ITB STIKOM Bali**

- Bachelor of Information Systems with a GPA of 3.92 and final thesis topic “ITB STIKOM Bali Online Student Information System Jimbaran Campus Website Based Using Laravel Framework”
- Achieved finalist status at the Informatics Festival and Competition (INVENTION) with a paper titled "Design and Construction of the Temple Information System as a Mobile Website-Based Tourism Platform," hosted by Udayana University.
